

- Easier Maintenance
- Flexible Customization
- ◆ Shared alternative replacement parts
- ◆ Various configuration

Sigma Care B-631 Electric Hospital Bed comply with the International Medical Technical and Equipment Quality Assurance standards which is the IEC 60601-2-52 & IEC 60601-01.

IEC 60601-2-52 standard is one part of a range of standards defining the requirements for the basic safety and essential performance of all Medical electrical equipment, while IEC 60601-01 standard is the requirement for medical electrical equipment.

Meeting IEC60601-2-52

Particularly focuses on the design safety for Adult Medical Beds

KA30 LINAK Low Voltage DC Actuator

Load thrust up to 3500N

Anti-Bacterial Powder (ABP) Coating

To provide with excellent rustproof and anti-bacterial effect

Double Auto-Regression

Reducing friction to a minimum

Removable PP Platform

Easily replaceable

SIGMA @ARE

(B-631)

ELECTRIC

Standard Features

- LINAK Low voltage DC actuator
- 5" central brake system with twin wheels
- Central control system for brake and steer
- Steel frame with Anti Bacterial powder coating
- Detachable PP Platform
- · Double auto-regression
- Movable Head and Foot boards with quick safety switch
- 11 columns aluminum collapsible side rail + grab bar
- 3 function bed hand controller with sensor lock (includes Exit, Examination and Electric CPR)
- CPR release for backrest
- · 4 corners with rolling bumpers
- 4 Multi function socket IV + Lifting pole
- · 4 urine bag hooks

WE IMPROVE YOUR LIFE POWERED BY LINAK

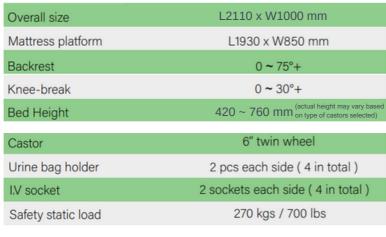

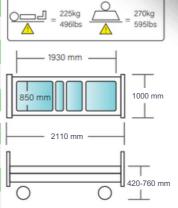

Optional Features

- Head X Ray
- In bed scale system (max. 250kg)
- Removable nursing controller
- Storage box
- Under bed light
- Bed extender (add 200mm length to the bed)
- Anti-static castor
- 5th wheel
- · Built in controller
- Backup battery
